E911 SERVICE

Enhanced 911 Service (E911) is a telephone exchange communication service whereby a Public Safety Answering Point (PSAP) may receive telephone calls dialed to the telephone number 911.

Resale

A monthly charge applies per line for the provision of E911 in counties equipped with E911 service. The charges for E911 are in addition to the base rates for local service as otherwise defined herein. Rates for E911 are dependent upon the location of the Customer and are determined as follows:

	<u>Monthly Recurring</u>	
Frontier ILEC exchanges	\$0.24 per line	
CenturyLink ILEC exchanges	\$0.20 per line	
<u>Facilities-Based</u>	\$0.13 per line	(N)

PUCO Tariff No. 3

SECTION 5 - MISCELLANEOUS SERVICE ARRANGEMENTS

CALLING NUMBER DELIVERY BLOCKING (CALL BLOCK)

Calling Number Delivery Blocking will allow the calling party to suppress a directory number such that the called party with Calling Number Delivery does not receive the information. The called party will receive a “private” message instead of the calling party’s directory number.

Customers utilize an activation code on a per call basis to prevent the disclosure of the calling party’s directory number. Use of the activation code prevents the number display on the ensuing call only and does not prevent the calling number from display on subsequent calls. The activation code must be utilized on each call.

Calling Number Delivery Blocking will be provided on a universal basis to all eligible customers at no charge.

**SECTION 9 - 811 SERVICE FOR "ONE CALL" NOTIFICATION
SYSTEMS (FACILITIES BASED)**

A. **GENERAL**

1. 811 Dialing Code ("811 Service") is a three digit local dialing arrangement for telephone voice transmission access to all certified "One Call" notification systems entities as a toll free call. The Federal Communications Commission (FCC) assigned 811 dialing code for nationwide access to One Call Notification Systems.
2. The three digit 811 abbreviated dialing One Call Notification code is assigned to the Approved "811 Provider" for use in providing One Call notification services to the public by way of voice grade facilities.
3. 811 Service is available from Telephone Service Company within the Company service area only. To provide access to 811 to end users in another company's service area or to Competitive Local Exchange Carrier (CLEC) end users within the local calling area, the 811 Provider must make appropriate arrangements with the other company or CLEC serving that territory. The 811 Provider should work separately with competing local providers to ascertain that its end user customers will be able to reach one-call services provided by dialing 811.
4. All 811 abbreviated dialing code calls must be local in nature and will not result in any expanded local calling area (ELCA), intraLATA toll, interLATA long distance or pay-per-call charges to Company subscribers. However, 811 Service calls may result in local measured service charges where company subscribers' service plans include such charges.
5. The 811 Service is not available for the following classes of service: inmate service, 1+ and 0+ calling, 0- operator assisted calling and 101XXXX calling. 811 Service is otherwise available wherever local service is accessible.

PUCO Tariff No. 3

SECTION 9 - 811 SERVICE FOR "ONE CALL" NOTIFICATION SYSTEMS (FACILITIES BASED) (Continued)

B. OBLIGATIONS OF THE APPROVED "ONE CALL" NOTIFICATION SYSTEMS PROVIDER

1. The 811 Provider must submit a written application to the Company for 811 Service at the state level. The 811 Provider may establish 811 Service in all or part of the Company's exchanges. There may be only one 811 Provider per exchange.
2. The 811 Provider's written application to establish 811 Service in a Company local exchange must include the following:
 - a. The local, foreign exchange or toll free telephone number into which the Company should translate the dialed 811 abbreviated code. If the 811 Provider desires to change the telephone number into which the 811 abbreviated dialing code is translated, the 811 provider must pay a number change charge as found herein.
 - b. For network sizing and protection, an estimate of annual call volumes and holding time for calls to the 811 Service.
 - c. An acknowledgment of the possibility that the Commission's assignment of the 811 abbreviated dialing code may be recalled at any time.
3. Local Calling for Company Subscribers
 - a. The 811 Provider, in cooperation with the Company, will assure that all 811 Service calls are local and do not generate ELCA, intraLATA toll, interLATA long distance or pay-per-call charges for company subscribers.
 - b. When the 811 Provider applies for 811 Service from the Company, the 811 Provider must supply the Company with a toll free number. The company will translate the 811 digits into the telephone number provided by the 811 Provider.
4. SECTION 11 – VOIP – PSTN TRAFFIC

1. Toll Voice Over Internet Protocol – Public Switched Telephone Network (“Toll VoIP – PSTN”) Traffic

Toll VoIP – PSTN Traffic is traffic exchanged between the Company and the Customer in Time Division Multiplexing (TDM) format that originates and/or terminates in Internet Protocol (IP) Format. Toll VoIP Traffic originates and/or terminates in IP format when it originates from and/or terminates to an end user customer of a service that requires IP-compatible customer premise equipment.

This section governs the identification and treatment of Toll VoIP – PSTN Traffic that is required to be compensated at interstate access rates unless the parties have agreed otherwise in a written agreement.

Company will bill and collect the full interstate switched access rate on traffic exchanged with Customers when such traffic originates and/or terminates in Internet Protocol format, as set forth in Section 51.913 of the Federal Communications Commission’s rules, 47 C.F.R. §51.913, regardless of whether the Company itself delivers such traffic to the called party’s premises or delivers the call to the called party’s premises via contractual or other arrangements with an affiliated or unaffiliated provider of interconnected Voice over Internet Protocol Service.¹

Intrastate Toll VoIP – PSTN traffic is subject to the Company’s applicable interstate switched access rate per minute, as set forth in the Company’s Interstate Tariff Filed by NECA.

A Customer delivering traffic to Company or the Company when it delivers traffic to the customer will identify the percentage of traffic that is Toll VOIP – PSTN Traffic (“Percentage VOIP Usage” or “PVU”) and will provide a traffic study or similar analysis that is subject to audit, not more than twice per year. The Company or Customer has the right to audit at the requesting parties expense. If a Customer fails to provide this information, Company will assign a default PVU equal to the Company PVU. If a customer chooses to revise its CPVU, it shall forward to the Company no later than 45 days after the first day of January and/or July, a revised CPVU based on the prior six months, ending the last day of December and June, respectively, along with supporting documentation for the prior 6 months period. The revised CPVU will apply prospectively and serve as the basis for billing until superseded by a new verified CPVU.

WC Docket No. 10-90, *et al.*, FCC 11-161, Released November 18, 2011. This information is set forth in Section 51.913 of the Federal Communications Commission’s rules, 47 C.F.R. §51.913.

PUCO Tariff No. 3

SECTION 11 – VOIP – PSTN TRAFFIC (Con't)

TSCCI is in the process of modifying its billing systems to implement the new PVU factoring process. All initial Customer PVU (CPVU) factors to the Company are to be provided no later than April 15, 2012 to qualify for retroactive rate adjustments back to December 29, 2011, the effective date of the new FCC regime. If a CPVU factor is not provided by April 15, 2012, there will be no retroactive rate adjustments and the default CPVU factor will be equal to the Company's PVU until the customer submits a verifiable CPVU complete with numerator and denominator data.

The company will determine a TSCCI ("TSC" Percent VoIP Usage) ("TPVU") factor representing the percentage of the Company's total access minutes in the State that TSC originates or terminates on its network in IP format. This TPVU shall be based on information such as the number of Company's retail VoIP subscription in the state (e.g. as reported on the FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.

The Company will calculate a combined Percent VoIP Usage (PVU) factor based upon the TPVU and the CPVU factors, using the following formula (where TPVU and CPVU are expressed as decimal percentages; e.g., a CPVU of 20% is expressed as 0.20):

$$PVU = CPVU + (1-CPVU) \times TPVU$$

This section of the tariff does not preclude the parties from negotiating different rates, terms and conditions governing compensation for toll VoIP-PSTN traffic. This tariff does not supersede rates, terms and conditions governing compensation for toll VoIP-PSTN traffic in existing interconnection agreements; and the rates terms and conditions governing compensation for toll VoIP-PSTN traffic in this tariff apply prospectively.
